2630 Rue Montjoie, Quebec City (QC) G1V 1J2

## EDUCATION

---

### Laval University

*B.Sc. Software Engineering, GPA: 3.82/4.33*

Quebec City, QC

*Jan. 2023 – Dec. 2026*

## PROFESSIONAL EXPERIENCE

---

### Software Developer Intern

May 2026 – Aug. 2026

*Ticketmaster*

- Fixed a bug that was stalling ticket orders, restoring processing with 97% test coverage
- Improved system capacity to handle 5x more purchases during high-demand on-sales
- Migrated an older ticket system onto the company's modern platform, with no disruption to customers
- Updated a core API used across 7 parts of the site without breaking any existing features
- Enabled software updates to go live with zero downtime for customers

### Full Stack Developer Intern

Jan. 2026 – Apr. 2026

*iA Financial Group*

- Cut recurring incidents in insurance systems serving millions via domain-specific error handling
- Restored cross-service transaction traceability by fixing JSON and MongoDB persistence defects
- Raised automated coverage on critical workflows with Apache Camel unit and integration tests

### Software Developer Intern

May 2025 – Aug. 2025

*Ticketmaster*

- Removed a 1MB / 425-order processing limit through event pagination, enabling large-scale events
- Raised automated test coverage from 28% to 89.41% (JUnit, Mockito, GitLab CI job with JaCoCo)
- Reduced support load by hardening error handling for third-party outages (GOLI, Atlas, Inventory)

### Analyst Developer

May 2024 – Dec. 2025

*Retraite Québec*

- Saved 75 hours monthly by automating email reports for 120 administrative units (Power Automate)
- Shipped a company-wide Power Apps tool raising employee awareness of conflicts of interest
- Migrated SharePoint sites with zero data loss and improved form usability (Power Apps, Figma)

## PROJECTS

---

### Campus Alarm Management System | *Java, REST, DDD*

- Built a campus security system processing fire, intrusion, and access-control events with automated responses

### Open Food Facts Canada | *Python, Flask, MySQL*

- Built an ETL pipeline merging food data from 3 sources and computing nutrition scores via a Flask API

### Interactive Restaurant Finder | *Vue, Leaflet.js*

- Built a web app to search restaurants, save favorites, and manage visits with map-based filtering

### CNC Panel Project | *Java, Swing*

- Built a desktop app for AVID CNC machines with tool management, GCODE export, and 3D simulation

### NRO Electronics | *React, Node.js, MySQL*

- Built a full-stack inventory and checkout/sales app for a retail chain, with JWT auth and role-based permissions

## SKILLS

---

**Languages:** Java, Python, C++, C, JavaScript, TypeScript, HTML, CSS

**Backend & Data:** Spring Boot, Spring Kafka, Flask, REST, GraphQL, Hibernate, MySQL, MongoDB, CQL, DuckDB

**Cloud & DevOps:** AWS, Kubernetes, Docker, Helm, Apache Kafka, GitLab CI, Azure DevOps, Prometheus, Grafana, Dynatrace

**Frontend & Tools:** React, Vue, Angular, JUnit, Mockito, Cucumber, Postman, Git, Jira, Figma

**Languages Spoken:** Bilingual English–French
